PROFESSIONAL SUMMARY

Software Developer with 4.5 years of experience building and maintaining large-scale enterprise applications using Java, Spring Boot, and Vue.js. Active open source contributor with 5+ merged pull requests in a globally adopted, enterprise-grade platform with 22,500+ GitHub stars. Skilled in cloud-native tooling including Docker, Kubernetes, and CI/CD pipelines. Passionate about workflow orchestration, event-driven systems, and contributing to open source communities.

WORK EXPERIENCE

Software Developer

Feb 2025 – Present

Persistent Systems | Client: Optum (UnitedHealth Group) | Bhopal, India

- Developed and maintained features on a large-scale enterprise healthcare application serving thousands of users
- Engineered full-stack solutions using Java Spring MVC — controllers, services, mappers — and Vue.js on the front end
- Optimised complex SQL queries and stored procedures, improving data retrieval performance for healthcare data workflows
- Managed CI/CD pipelines using Jenkins and maintained Git-based version control workflows across multiple development teams
- Collaborated in Agile sprints — sprint planning, requirement gathering, and peer code reviews

Software Developer

Nov 2022 – Feb 2025

Encora | Client: Optum (UnitedHealth Group) | Bhopal, India

- Delivered continuous feature development on the Optum enterprise platform across employer transition with no break in continuity
- Built new application modules and maintained existing features within a large-scale legacy Spring monolithic codebase
- Implemented end-to-end UI changes across controller, screen, and mapper layers with Vue.js front end
- Worked with Eclipse IDE, Jenkins CI/CD pipelines, and SQL-based backend systems on a daily basis

OPEN SOURCE CONTRIBUTIONS

Open Source Contributor

2024 – Present

Kestra | github.com/kestra-io/kestra

- Contributed 6 merged pull requests to a globally adopted open source orchestration platform used by enterprise organisations including Fortune 500 companies
- Improved platform discoverability and UX by introducing a dedicated workflow creation entry point on the dashboard, reducing navigation friction for new and existing users (PR #5689)
- Enhanced interface consistency by relocating primary action buttons to the navigation bar, aligning the platform with standard web application design patterns (PR #5697)
- Engaged with the core maintainer team through code reviews, issue discussions, and iterative feedback — gaining experience contributing to a fast-moving, production-grade open source codebase
- Familiar with the full open source contribution lifecycle: issue selection, branch workflow, pull request submission, review iterations, and merge

TECHNICAL SKILLS

Languages & Frameworks: Java, Spring Boot, Micronaut, Spring MVC, SQL, JavaScript, Vue.js, React

Cloud & DevOps: Docker, Kubernetes, Git, Jenkins, CI/CD Pipelines, Linux

Tools & Platforms: GitHub, REST APIs, Workflow Orchestration, Agile, Scrum, IntelliJ IDEA

EDUCATION

Technocrats Institute of Technology (RGPV)

2018 – 2022

Bachelor of Engineering, Computer Science Engineering | CGPA: 8.33 | Bhopal, India
